

Sign Language classes for the whole family!
Congratulations on finding the most FUN way to learn American Sign Language!

Baby Signing Time “Sign and Play” Classes (ages 3 mos. – 3 yrs. old with parent/caregiver)

Sign Language classes that are fun and interactive for both parents and children! Two-way communication through signs allows for bonding and lessens frustration as children learn to express their needs and feelings months before they can speak. The reason for this is physiological: children's motor skills develop about three months before their verbal skills. Post-verbal children will improve their spoken vocabulary as they associate a sign with the written word, spoken word, and either the real object or a picture. We will incorporate story time, music and dancing, games, and snack time to teach new signs and attach them to concrete concepts. You will be amazed at all the things your little one has to say (and sign) to you!

Classes 1-8 Wednesdays, October 19th - December 7th, 2011 4:00pm - 4:45pm \$15.00 per child/class (sibling discount available)
 Classes 9-16 Dates TBA

Signing Time Academy Classes (ages 4-10 years old. Parents encouraged to participate)

Sign Language classes that make learning a second language fun! Children will learn signs quickly and easily through story time, singing and dancing, games, and possible field trips. In addition to discovering a new enriching language together, there are many more benefits to signing with your child such as enhanced communication skills, reduced frustration, improved reading skills, empowers any individual with special needs, and may even boost IQ. Approximately 150 signs including the manual alphabet, numbers 1-20, and other signs that are commonly used in school settings, while interacting with peers, and in everyday conversation will be taught. Students will receive flashcards and a list of books that contain the signs learned for each lesson.
